

Phytolacca americana

Pokeweed

A beautiful plant that can become a troublesome weed. Tall, with thick, red stems, racemes of white flowers, and beautiful, arching clusters of purple-black berries. Use with caution; this plant spreads aggressively. Poisonous berries and roots.

Suggested companions: Canada goldenrod (*Solidago canadensis*), smooth aster (*Aster laevis*), wild bergamot (*Monarda fistulosa*), black-eyed Susan (*Rudbeckia hirta*)
